## **DETAILED ACTION**

### ***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, drawn to an isolated nucleic acid encoding a protein homologous to a subset of CD2 receptors, a nucleic acid encoding a CS1 receptor, a nucleic acid encoding SEQ ID NO:2 and a nucleic acid comprising SEQ ID NO:1, classified in class 536, subclass 23.5.
  - II. Claims 7-13, drawn to the proteinaceous molecule or biological equivalent of the isolated nucleic acid of Group I, classified in class 530, subclass 350.
  - III. Claims 14-35, drawn to a monoclonal antibody and a fusion cell line, both antibody and cell line produced by immunization of an animal with a natural killer cell surface receptor, classified in class 530, subclass 388.22 and class 435, subclass 334.
  - IV. Claims 36 and 37, drawn to methods to inhibit the growth of a tumor comprising contacting the antibody of Group III with natural killer cells, classified in class 424, subclass 141.1.
2. The inventions are distinct, each from the other because of the following reasons:

Art Unit: 1642

Inventions of Groups I, II and III are structurally and functionally different products which are made by different methods and have different uses. The examination of all groups would require different searches in the U.S. Patent Shoes and the scientific literature and would require the consideration of different patentability issues.

Inventions III and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the monoclonal antibody of Group III can be used in an in vitro diagnostic assay or in a process to make an anti-idiotypic antibody.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter and because the searches required for the groups are not co-extensive, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1642

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karen Canella whose telephone number is (703) 308-8362. The examiner can normally be reached on Monday through Friday from 8:30 am to 6:00 pm. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Caputa, can be reached on (703) 308-3995. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.
